UPDATE 7/26/10

Bill Colgan, "Father of the Car Bra", created the first car bra in 1961 for German engineers interested in providing a better protective cover for use while road testing cars...particularly new Porsches!

The Colgan commitment to testing and development continues today and our bras set the standards by which others are measured. Features that make Colgan the BEST include:

- **The heaviest vinyl for maximum protection** - 25 oz. 100% virgin vinyl with exclusive memory fit.
- **Special vinyl topcoat** - specially formulated UV-resistant finish helps prevent aging & cracking.
- **Super soft , thick, porous flannel backing** - helps protect paint finish & allows moisture to escape.
- **Attached components** - no loose mounting pieces; everything is attached to the bra for easier installation.
- **Finished with soft felt binding** - all edges & openings are bound to help protect the vehicle finish.
- **Strong top/double stitching** - hand-tailored finish for durability.
- **Double padding at critical fender areas** - helps prevent wear-through and protect the vehicle finish.
- **3 year limited warranty** - longest warranty in the aftermarket.
- **Custom design available** - bras can be custom made with specified features (extra-cost option).
